EXPERIENCES:

Quality Assurance Analyst

May 2026 - Present

Testronic Labs

- Created and executed test cases using Zephyr to validate functionality, verify requirements, and ensure expected results were met.
- Used Airtable and Microsoft SharePoint to monitor QA results, review failed items, and track defect lists submitted by Quality Assurance Technicians (QATs).
- Used Jira to triage, and track bug tickets throughout the testing process.
- Communicated with overseas clients through Slack, providing testing updates and reports.
- Led and coordinated QATs, providing guidance and monitoring their testing activities.

Quality Assurance Technician

Sept 2025 - May 2026

Testronic Labs

- Executed test cases using Zephyr for Jira, verifying actual results against expected results.
- Used Microsoft SharePoint and Jira to document defects, create defect lists, and submit bug tickets based on identified issues.
- Used Airtable to monitor and track passed and failed QA items based on testing results.
- Performed testing across multiple platforms, including Windows, iOS, and Android.

Quality Assurance | Front-End Developer | External Project Lead

Feb 2025 - June 2025

Software Research Group (Internship)

- Collaborated with external clients to develop systems based on their needs and requirements.
- Applied Agile Scrum practices to support project planning, development, testing, and timely delivery.
- Performed quality assurance testing and front-end development throughout the system development process.
- Presented system progress and project outputs to external clients.
